

SOPHOS small business suite

MULTI-TIER PROTECTION

Multi-tier virus and spam protection

Sophos Small Business Suite is a multi-tier solution for small businesses and includes both anti-virus and anti-spam protection for desktops, file servers and email servers. Award-winning virus and spam detection technology is matched by easy-to-use management and updating functionality, specially designed to make life easier for small businesses.

How it works

The virus detection engine in Sophos Small Business Suite is complemented by industry-leading anti-spam technology to keep networks virus-free and inboxes free of unsolicited bulk emails.

- **End-user interface:** Even non-technical users can install and manage the software quickly and easily using the straightforward interface – deploying the software across their entire network from a central location in a matter of minutes.
- **Sophos Control Center:** An instant overview of the status of every Windows computer on the network is provided by the Sophos Control Center. This allows unprotected or new computers to be identified and virus alerts to be monitored. Shortcuts to specific tasks simplify central deployment and management.
- **Sophos PureMessage Console:** Flexible configuration options allow businesses to define their virus scanning as well as their spam identification and handling policies (e.g. delete, quarantine, tag-and-deliver).
- **Sophos AutoUpdate:** Users are always protected from the latest virus threats. Sophos AutoUpdate checks the Sophos website hourly for the latest virus and spam updates, automatically delivering and deploying them across the network.

Sophos Small Business Suite: your best defence against viruses and spam.

Features and benefits

Sophos Small Business Suite is tailored to suit the needs of small businesses.

- Protects Windows and Macintosh desktops, file servers and Microsoft Exchange/SMTP email servers.
- Detects and disinfects viruses, Trojan horses and worms at the desktop and in all email traffic, ensuring total protection of the entire network.
- Keeps inboxes free of unsolicited email, blocking up to 98% of spam. Safeguards email productivity by removing unwanted and unsolicited email before delivery to end users.
- Simplifies the management, configuration and administration of key tasks.
- Installs from a central location to protect the entire network.
- Synchronises virus and spam updates automatically over the internet direct from Sophos using Sophos AutoUpdate.
- Updates roaming laptop users – either manually or via a scheduler – from their company's website or directly from Sophos.
- Monitors all virus entry points, including disks, programs, documents, network drives and CD-ROMs, as well as email and internet downloads at the desktop.
- Allows end users to monitor, retrieve or delete their individual spam through a web-based quarantine digest.
- Responds rapidly to new virus and spam threats, supported by Sophos's global research labs.
- Includes access to the Sophos support knowledgebase and unlimited 24-hour telephone and email support, 365 days a year.

Function Protects desktops, file servers and email servers by detecting, reporting and disinfecting viruses, spam and other email-borne security threats.

Windows desktop computers

Operating system and minimum service packs (SP):

Windows 98 SE/Me plus Internet Explorer 5.

Windows 2000 Pro/Server plus SP2.

Windows XP Home and Pro plus SP1.

Windows 2003 (no SP required).

Disk space and memory:

90 MB free disk space.

Windows 98 SE/Me – minimum RAM 48 MB, 64 MB recommended.

Windows 2000 Pro/2000 Server/XP Home/XP Pro/2003 Server – minimum 128 MB,

256 MB recommended.

Server computer (including Sophos Control Center)

Operating system and minimum service packs (SP):

Windows 2000 plus SP2.

Windows XP Pro plus SP1.

Windows 2003 (no SP required).

Note: We recommend that Server operating systems are used, i.e. Windows Server with SP2+ or Windows 2003.

Disk space and memory:

240 MB free disk space, 256 MB RAM.

Mac OS X computers

Operating system:

Mac OS X 10.2 and higher.

Disk space and memory:

70 MB free disk space, 128 MB RAM.

System requirements (email server)

SMTP-only version

Operating system and minimum service packs (SP):

Windows 2000 Server/Pro plus SP3 plus Microsoft Internet Information Server (IIS).

Windows 2003 Server (no SP required) plus IIS.

Windows XP Pro plus SP1 plus IIS.

Disk space and memory:

140 MB free disk space, 256 MB RAM.

Microsoft Exchange version

Operating system and minimum service packs (SP):

Windows 2000 Server plus SP3; Windows 2003 Server (no SP required).

Exchange 2000 plus SP3; Exchange 2003 (no SP required).

Disk space and memory:

140 MB free disk space, 256 MB RAM.

Language versions

Windows and Sophos Control Center: English, Japanese, German, French, Spanish, Brazilian Portuguese, Italian, Simplified Chinese, Korean and Traditional Chinese.

Macintosh: English, Japanese, German, French and Spanish.

Email server: English and Japanese, including support for multiple language email streams.
